

## Samples Legal Contract For Web Designers And Web Developers

For any client job or professional app/service, making a clear contract with the customer is one of the key points for the success of the project and happiness for both sides.

Recently, Smashing Magazine **has brought together** design/development-related contracts that exist on **Docracy** and encourages everyone to share any new ones.

The list includes **sample contracts for web design, icon design, copyright ownership and licensing, app design and much more.**

If you're doing a **BIG** project with design and code:

- [Design and Development Contract](#)  
A classic design contract, heavily indebted to the [AIGA Standard Master Agreement](#), that is for even bigger projects.
- [Acuerdo de Desarrollo de Software](#)  
A handy Spanish version of the contract above.

If you're doing **UX** work:

- [Contract for User Experience Design](#)  
A version of Contract Killer, customized for UX work.

Simply, a must-bookmark for creative in case you don't have a ready-to-use contract yet.

**P.S.** You should also check [Docracy](#) for any kind of contracts. It is a great legal resource.
